Sallaheddine Dari

Software Engineer

I am Sallaheddine, an ICT specialist with knowledge of various applications and programming languages. I have a particular interest in Cloud, Data and AI. As a dedicated team player, I am proactive and helpful, always focused on achieving common goals. In addition to my current technical skills, I continuously seek opportunities for professional growth and am open to learning new technologies.

Work Experience

February 2025 - June 2025

Schuberg Philis | Boeing Avenue 271

Graduate Intern

In my graduate internship, I developed a system that automatically generated security reports from software vulnerabilities in AWS environments, targeting various stakeholders (Product Owners, C-Level, CISOs, etc.). Using Large Language Models (LLMs), I generated contextual text to clarify vulnerability visualizations. My research focused on optimizing reporting for various stakeholders and improving data translation through effective prompt engineering.

Februari 2024 - Februari 2025

Schuberg Philis | Boeing Avenue 271

AWS Cloud Engineer

After my internship, I started working as a part-time AWS Engineer, focusing on developing ETL pipelines and managing cloud infrastructure with Terraform. I was responsible for implementing workflows in Apache Airflow, which contributed to more efficient data integration processes and automation within the company. This role allowed me to deepen my technical skills and work on complex problems in a dynamic IT environment.

September 2023 - Februari 2024

Schuberg Philis | Boeing Avenue 271

Mission Critical Engineer Intern

As an intern in the Mission Critical Engineer position, I played a critical role in developing methods for monitoring system health using AWS cloud services. My responsibilities included designing and implementing monitoring solutions, which enabled real-time tracking of system performance and immediate response to problems. Although I was still in a learning phase, this role gave me a fundamental understanding of cloud architecture and best practices.

Juli 2022 - September 2023

YoungOnes

Freelancer

As a freelancer with YoungOnes, I worked primarily in the logistics sector, where I assumed critical responsibility for the efficient coordination of goods flows. This role included planning, executing and overseeing various logistics operations.

Education

HBO-ICT - Software Engineering

2021-2025

Hogeschool van Amsterdam (HvA)

HAVO (C&M)

2015-2021

Hervormd Lyceum West
